Marshall Scientists Study What's Hot and What's Not in Atlanta

During a day-long research effort in Atlanta, planned for later this week, Marshall scientists with the Global Hydrology Center will lead a study to determine how rapid urbanization has affected climate and air quality in the Atlanta area. A specially instrumented NASA jet will fly over the city to make a thermal map of the area, showing "what's hot and what's not." Research could lead to lower air conditioning costs, improved air quality and sustainable urban development in Atlanta and other major cities nationwide.

Office of Aeronautics and Space Transportation Seeks New Logo

NASA's Office of Aeronautics and Space Transportation Technology is holding a contest to design a new logo. Entries will be judged on content, design, size, and image usability and reproduction. For more information, see the NASA web site, "<http://www.aero.hq.nasa.gov/oastthp/curevent/realwrlld.htm>", or call Humphrey Crocket at NASA Headquarters at (202) 358-2410.
